

# Jordan Clinton Hess

**JUNIOR DEVELOPER | SOCIAL MEDIA SPECIALIST**

I'm a Social Media Specialist with 4 years of experience in customer support and business operations, with a strong focus on problem-solving, analytical thinking and process improvement. Through independent learning and hands-on development projects, I've built a growing skill set in software development, programming and modern web technologies. I'm looking to combine my business knowledge with my technical abilities to develop practical software solutions, while continuing to grow as a Software Developer.

## Education

Bachelor, Groenvlei High School, Cape Town

**JANUARY 2016 - DECEMBER 2020**

Life Choices Coding Academy, Cape Town

**MARCH 2021 - SEPTEMBER 2021**

Completed six months of intensive software development training at Life Choices Academy, gaining hands-on experience in programming, frontend and backend web development, database management, version control and core software development principles. Applied these skills through practical projects, developing a strong foundation in building and maintaining web applications.

## Employment History

Junior Web Developer Intern, LC studio,

**SEPTEMBER 2021 - DECEMBER 2021**

Completed an internal internship, applying software development knowledge and technical skills in a practical business environment. Gained hands-on experience in developing solutions, understanding system requirements, troubleshooting technical issues, improving processes and supporting day-to-day operational needs.

Rain Intern

**JANUARY 2022 - FEBRUARY 2022**

Completed an internal internship, applying technical and software development skills in a practical business environment. Gained exposure to system functionality, technical troubleshooting, identifying and resolving problems, understanding business requirements and developing solutions to support operational processes.

Social Media Specialist

**FEBRUARY 2022 - CURRENT**

Social Media Specialist with 4+ years of experience in customer support, technical troubleshooting and business operations. Strong problem-solving and analytical skills, with experience identifying issues, understanding user needs and finding practical solutions. Developed a growing interest in IT through hands-on experience with systems, technology and software development, with a strong focus on troubleshooting, process improvement and continuous learning.
